

BPV H.E.P.A. Back Pack Vacuum

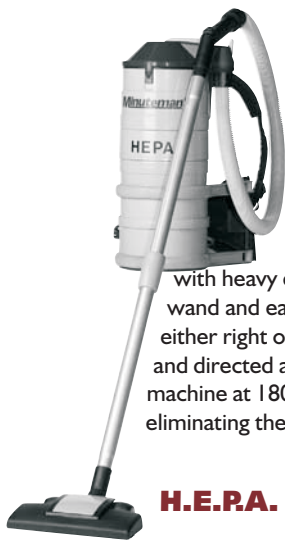

**Lightweight and Portable Combines
with H.E.P.A. Filtration.**

Lightweight and portable, Minuteman's H.E.P.A. Back Pack Vacuum is very versatile. This critical filter vacuum is ideal for use in applications where there is a need to remove hazardous materials while preventing it's escape into the environment. High productivity, precision, and ergonomics combined with H.E.P.A. filtration make the H.E.P.A. Back Pack Vacuum the ultimate in safe and efficient clean-up.

Operator Friendly.

The H.E.P.A. BPV features an ergonomic design that produces less operator fatigue than the lightest upright and offers wide padded shoulder and waist straps which adjust to any size user. Lightweight is important; however, the proper distribution of weight makes the machine feel even lighter during operation. This unit rests on the operator's hip to eliminate any discomfort to the shoulders or strain on the back. To aid in movement, the H.E.P.A. BPV includes a 50-foot power cord

with heavy duty cord restraints, five-foot hose, telescopic wand and easy-roll floor tool. This unit is also adaptable for either right or left handed users. The exhaust air is diffused and directed away from work areas near the base of the machine at 180 degrees instead of top or bottom, thereby eliminating the possibility of blowing papers or raising dust.

H.E.P.A. Filtration.

The BPV H.E.P.A. filter is 99.97% efficient at 0.3 micrometers. With a four-stage filtration system, this critical filter vacuum is approved for use in hospitals, schools, testing labs, nuclear labs; wherever there is a need to remove hazardous materials and prevent its escape into the environment. The H.E.P.A. filter will filter out any air contaminants including asbestos, lead and mold.
