

# **CERTIFIED INCINERABLE DISPOSABLE OVER GARMENT**

## **1872CI**

Durable and strong, this Certified Incinerable outer garment is long on comfort: compare its cool breathability to competitive products. The provided protection from hot particle contamination increases the wearable life of expensive cotton coveralls.

- Water repellent
- Various styles available
- Reduces skin contamination
- Approved for asbestos work

# **MODESTY GARMENT**

## **FS817 Pants / FS6617 Shirt**

This layer of protection under the cotton coverall allows you to increase clothing radiological limits and reduce clothing reject rate, thereby lowering radwaste costs. Increase productivity by eliminating dress-out time during breaks; at the same time, increase worker comfort. The modesty garment prevents skin contamination, while enhancing your company's image in dress-out area.
