

STAY CLEAN™

PROTECTIVE GARMENTS

Frham's "STAY CLEAN" breathable fabric was designed for durable use while keeping the worker comfortable. The material consists of a trilaminated construction which incorporates spunbound outer layers that sandwich a meltblown layer of fibers. This process creates a water resistant and particle barrier designed for single usage.

DESCRIPTION

FSV2042

Coverall, yellow, zipper front closure, one see thru left breast pocket with dosimeter tab above the pocket, hemmed ankles and wrist. Seams at crotch are reinforced with binding for superior strength.
