

# STAY COOL™

## PROTECTIVE GARMENTS

Frham's "Stay Cool" fabric is a breathable liquid and particle barrier ideal for high contamination and wet work areas. The fabric creates a total barrier utilizing Microporus Film technology. The film is laminated to non-woven absorption layers that wick moisture away from the body for comfort and increased stay times. The seams are reinforced with latex for added strength and impermeability.

### DESCRIPTION

	Small	Medium	Large	X-Large	2X-Large	3X-Large	4X-Large	Maximum
A. Sleeve	31	32-1/2	33-1/2	35	36-1/2	37	37-1/2	+2
