- Tempro® - the choice for disposable, secondary fire resistant protection - is now blue. Formerly MarGuard® Plus, the product did not change - just its name and color. Now, secondary FR protection from DuPont Personal Protection is sold only under the Tempro® name.
- # / # represent items that are identical and can be ordered by either number.
- Tempro® garments are flame retardant treated, not inherently flame retardant, and are intended to be worn over your primary flame resistant apparel.
- Note: Not all sizes available in all styles.
- Warning: Garments made of FR fabrics should have slip-resistant or antislip materials on the outer surface of boots, shoe covers or other garment surfaces in conditions where slipping could occur.
