

VACUUMS, HOSES and ACCESORIES

Unique HEPA

Hepa Vacuums For The Recovery Of Lead Dust, & Paint Chips Designed Specifically For Unique Tools

How it works

Unique HEPA Vacuums were designed for safe and efficient use in commercial and industrial sites. Conventional vacuum cleaners exhaust unseen lead particles back into the environment, compounding the existing hazard. With the Unique HEPA Vacuums, particulates are contained within a special filter, allowing no hazardous dust to escape back into the air. As an added precaution, a patented interlocking safety system prevents the vacuum from being operated without the HEPA filter.

BENIFITS

- * HEPA Filter is 99.99% efficient @ .12 microns
- * Patented self-sealing intake ensures a positive vacuum seal while allowing hose to swivel
- * Easy to empty
- * Simple to operate
- * Wide range of models and various tank capacities that are capable of supporting 1 to 6 power tools
- * Meets or exceeds OSHA and EPA standards for worker safety

HOW IT WORKS

- Industrial Maintenance Projects
- Power Tool Cleaning
- Waterblasting Operations
- Lead and Asbestos Projects
- Residential & Housing Renovation

Dry Materials

Unique HEPA Vacuums recover dry materials such as sand, soot lead and asbestos in both commercial and industrial environments. Our vacuums are specifically designed for use with our Unique Tools.

Liquid Materials

The Unique HEPA Vacuums are the perfect tools for the removal of unwanted liquids such as oil, grease, contaminated water and mud.

General Clean-Up

The design of the Unique HEPA Vacuums allow them to be used in a variety of clean up applications. From chemical stripping to the vacuuming of lead or asbestos, these Unique Vacuums can be used in virtually any application.

HOSES and ACCESORIES

Lightweight, Abrasion Resistant Vacuum Discharge Hose

SMOOTH POLYURETHANE LINING

Provides resistance to abrasion
Eliminates material build-up
Rated for full vacuum
Pressure rated to 35 psi (2.3 bar)

BLUE HMW PVC FLEXIBLE

Provides sub-zero flexibility
Lightweight for easy handling
Formulated with anti-static compounds

EXPOSED BLACK RIGID PVC HELIX

Abrasion resistant
Allows hose to slide easily
Easier to handle

AVAILABLE SIZES

- 3" Density Controller
- 4" Density Controller

Density Controllers are used for pneumatic conveying of materials. They are ideal in applications where you are pneumatically conveying liquids or solids and/or where high vertical lift is required.

All density controllers are supplied with 18" of Enviroflex

V2 VACUUM KIT

- Recommended for use with all air operated pumps and vacuum systems.
- Lightweight, but built for punishing industrial applications.
- Cast Aluminum head swivels on a heavy gauge wand.
- Mouth of gulper has anti-spark bronze wear plate.

V2 Vacuum Kit Includes

- (1) Gulper Vacuum Head
- (1) 2"x 6' Aluminum Wand
- (25') 2" Enviroflex Vacuum Hose
- (1) 3" to 2" 4" to 2" Adapter
